IDEOLOGY

Health is the most important thing and due to the present situation, we all can understand it as we are working and studying from home since last 2 years. Now that the situation is returning to normal but we should not be careless about it, the threat of covid is not completely over yet. Having a complete information about the people around us are vaccinated or not and maintaining the all rules and regulation is our responsibility. Our project will make this task much easier and help everyone to stay safe.

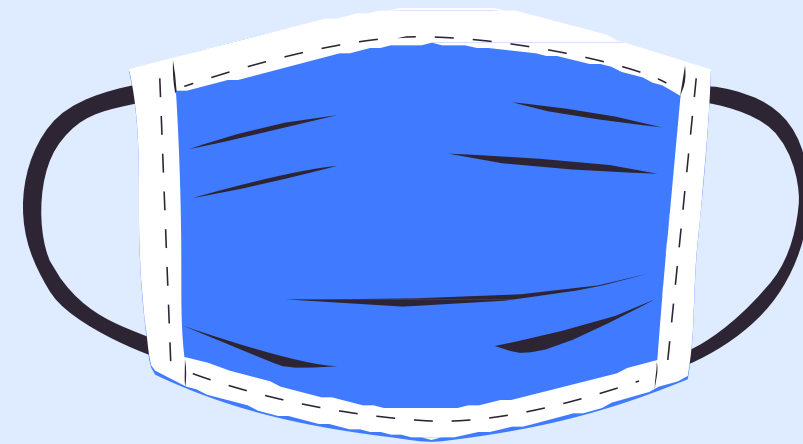

OUR VISION

- We aim to design and create a data management system that will store the data of all the people who are vaccinated with the prevention vaccine of Covid.
- This will include a form to be filled by people which will provide us with the information of vaccinated people in the vicinity.
- Anyone with an account can form and view the data whereas only the admin has the authority to delete the data. The software, of this vaccination, has a very user-friendly and simplistic interface.
- In the dashboard, there are also options to view the stats of the people vaccinated out of the total.

TECHNOLOGY USED

- HTML 
- CSS 
- JAVASCRIPT 
- PHP
- MYSQL 

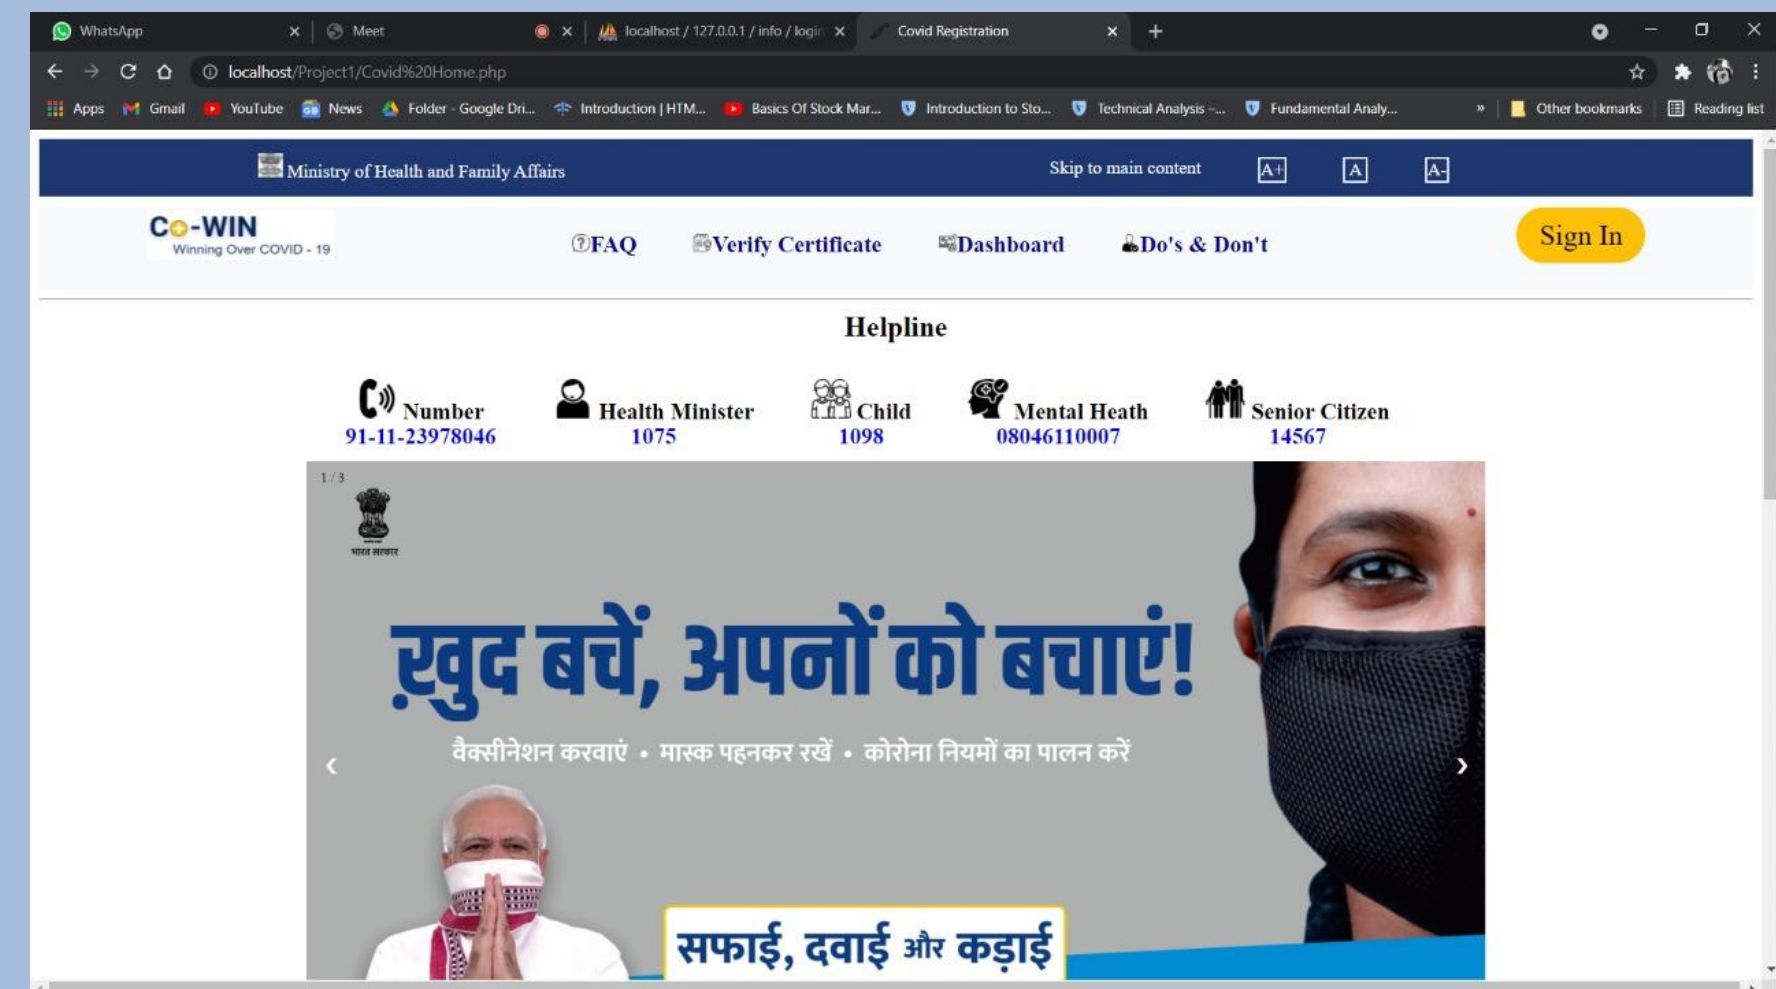

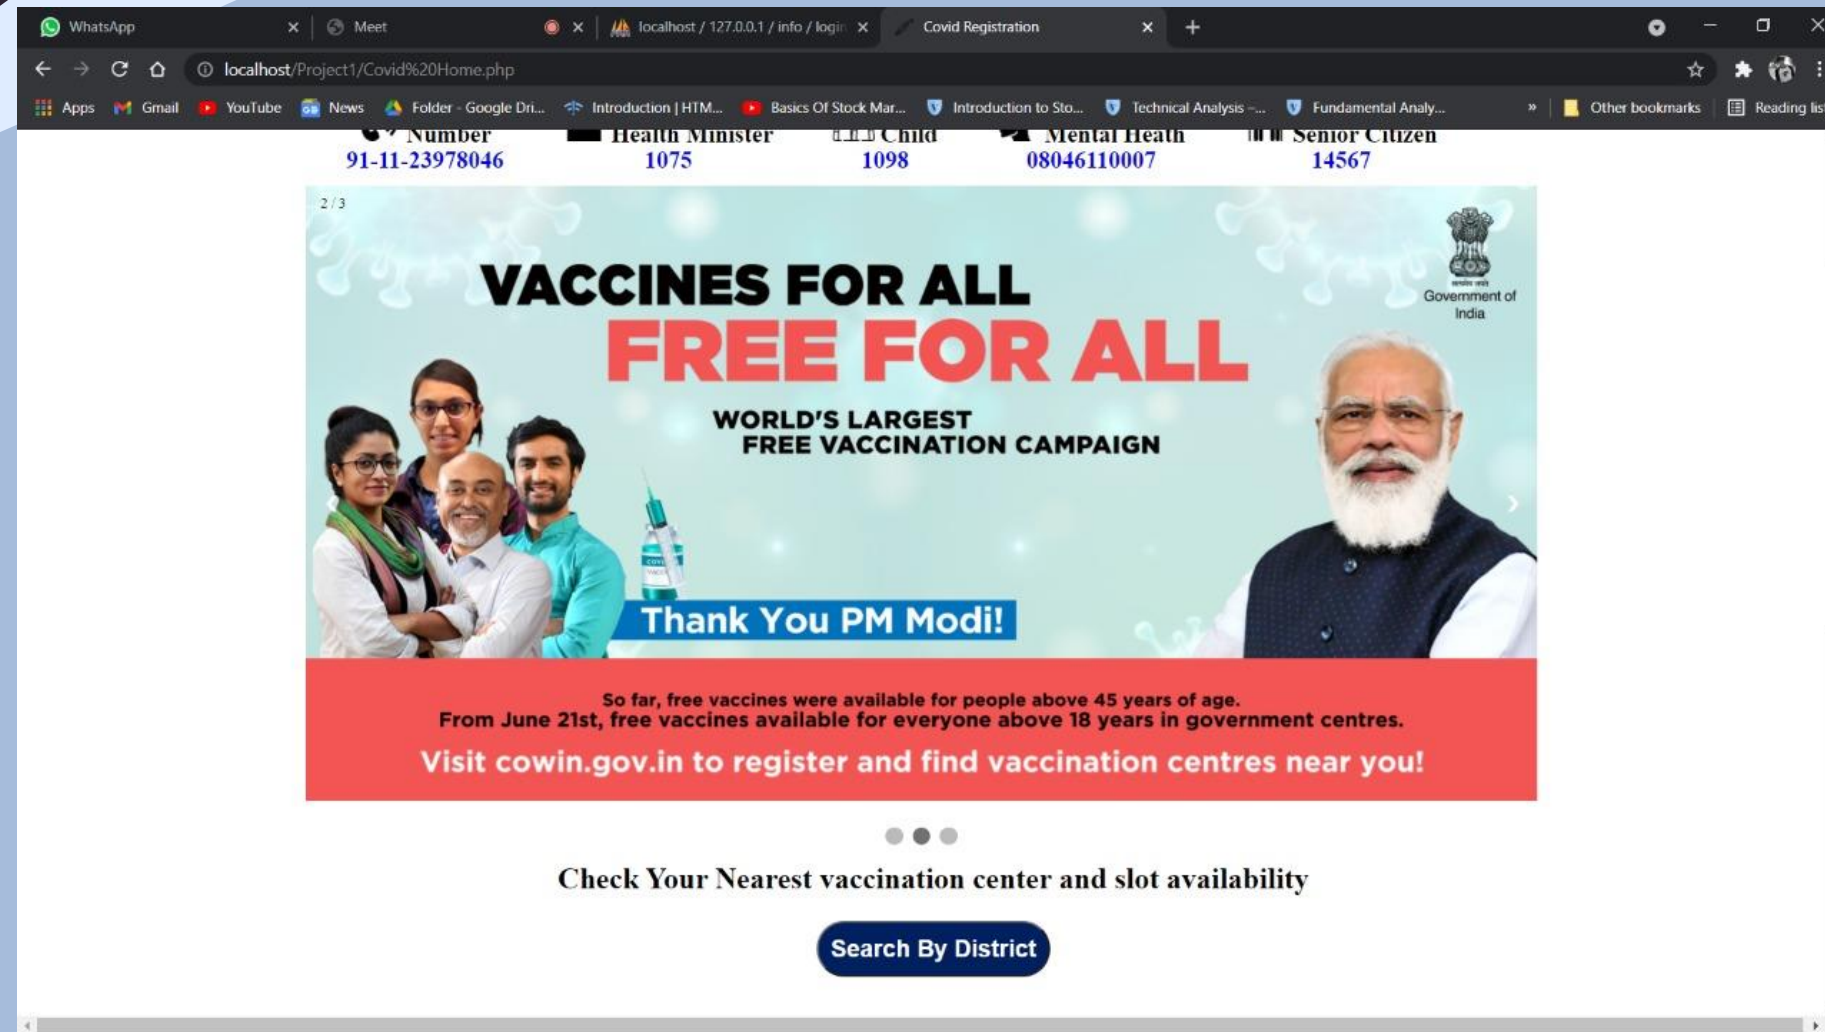

THUS THE SYSTEM
PROVIDES A 100%
AUTOMATED
SYSTEM TO
COLLECT THE DATA
OF PEOPLE.

FEATURES

- ❖ Login Functionality
- ❖ Register Functionality
- ❖ Fill up a form
- ❖ Check available Slots for Vaccine
- ❖ Read Blogs related to Covid
- ❖ Access FAQs
- ❖ Add or Delete data from the database
- ❖ Delete User accounts

Dose 2 | Covishield COMPLETED

Dose 2 | Covishield COMPLETED

Note

One registration per person is sufficient. Please do not register with multiple mobile numbers or different Photo ID Proofs for same individual.

Scheduling of Second dose should be done from the same account (same mobile number) from which the first dose has been taken, for generation of final certificate. Separate registration for second dose is not necessary.

Please carry the registered mobile phone and the requisite documents, including appointment slip, the Photo ID card used for registration, Employment Certificate (HCW/FLW) etc., while visiting the vaccination center, for verification at the time of vaccination.

Please check for additional eligibility conditions, if any, prescribed by the respective State/UT Government for vaccination at Government Vaccination Centers, for 18-44 age group, and carry the other prescribed documents (e.g. Comorbidity Certificate etc.) as suggested by respective State/UT (on their website).

The slots availability is displayed in the search (on district, pincode or map) based on the schedule populated by the DIOs (for Government Vaccination Centers) and private hospitals for their vaccination centers.

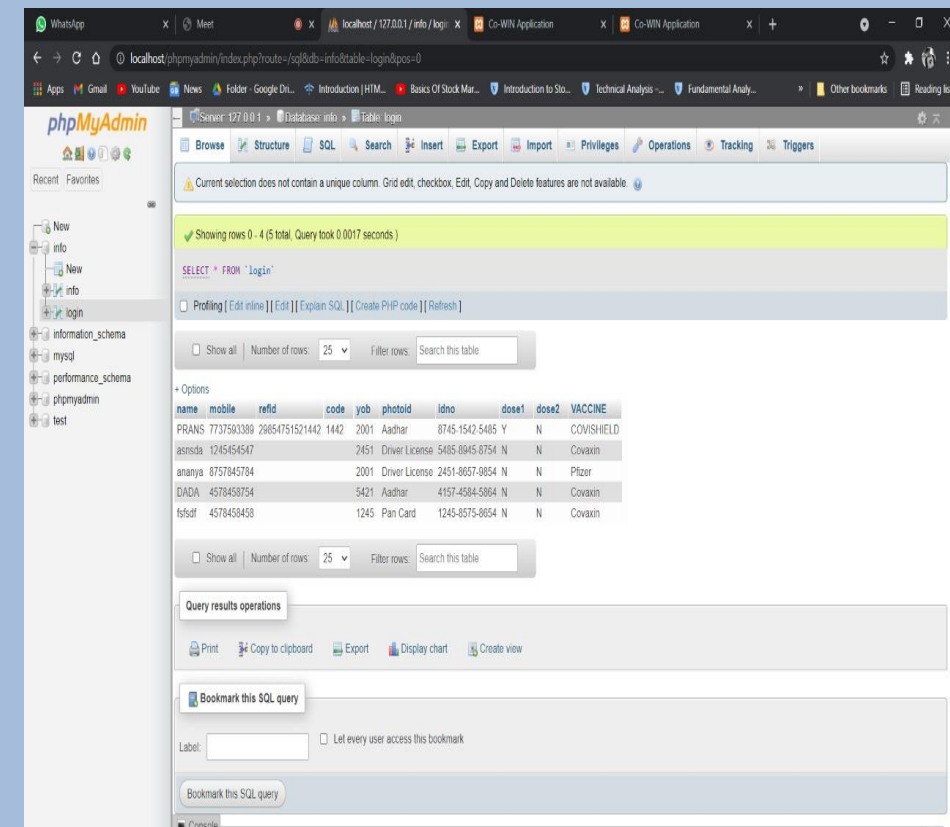

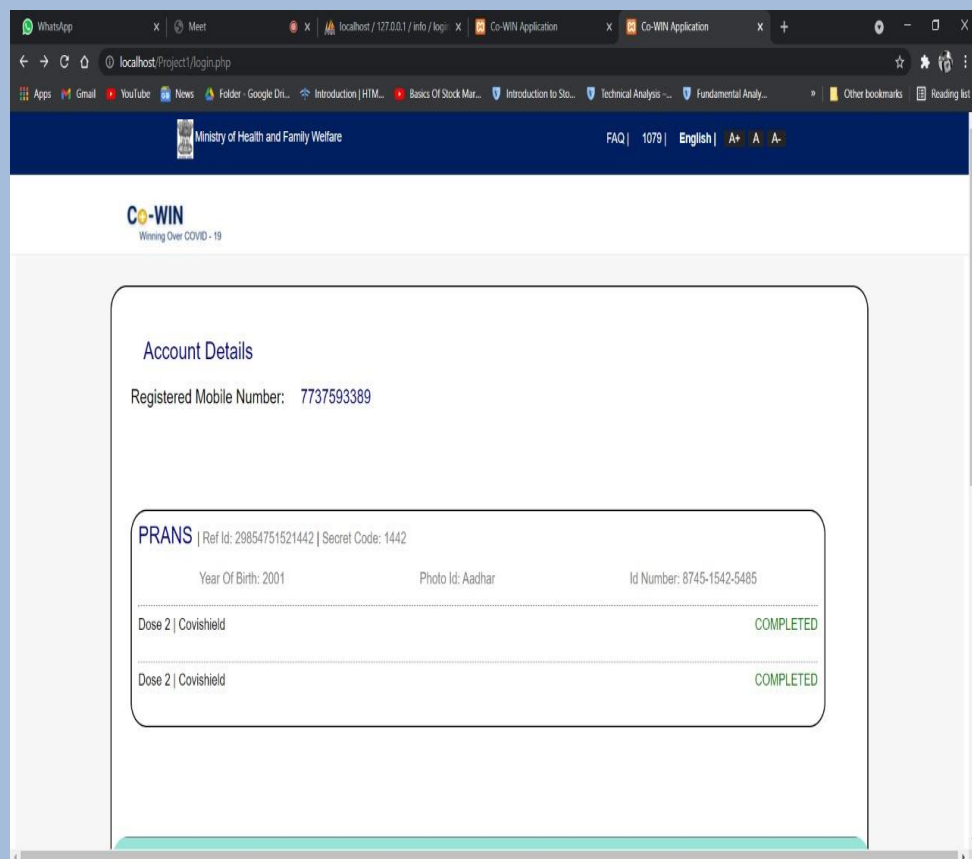

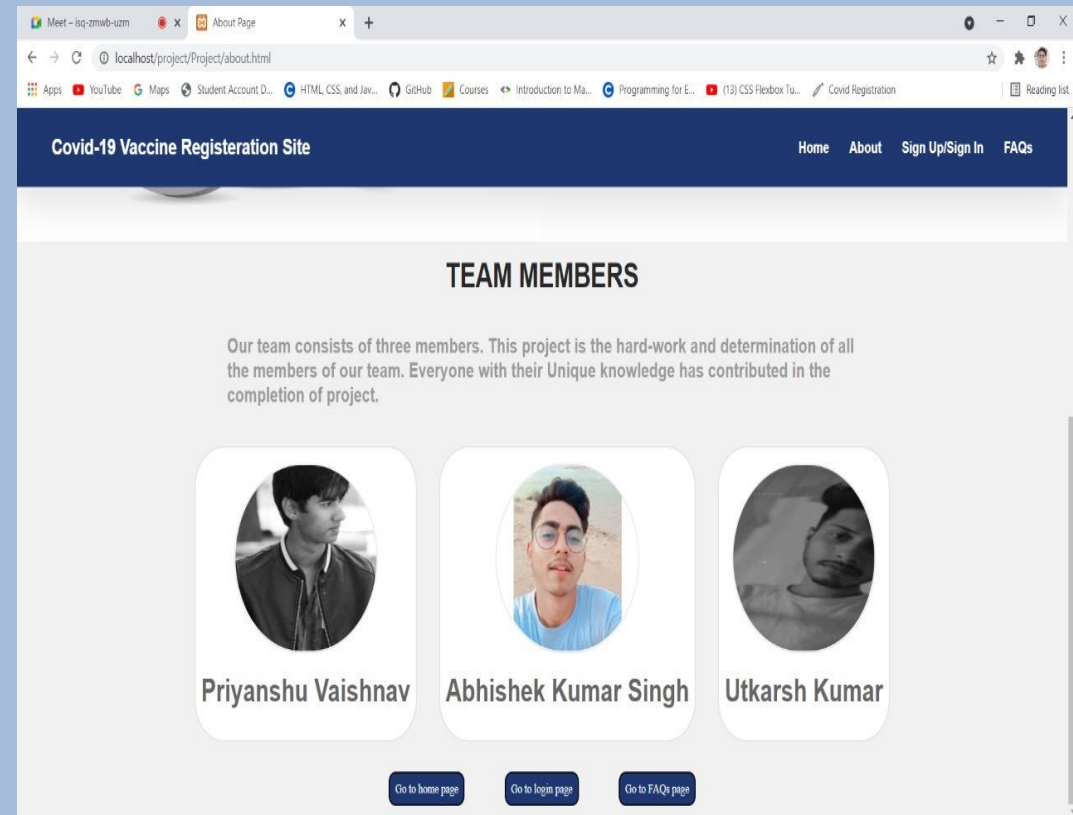

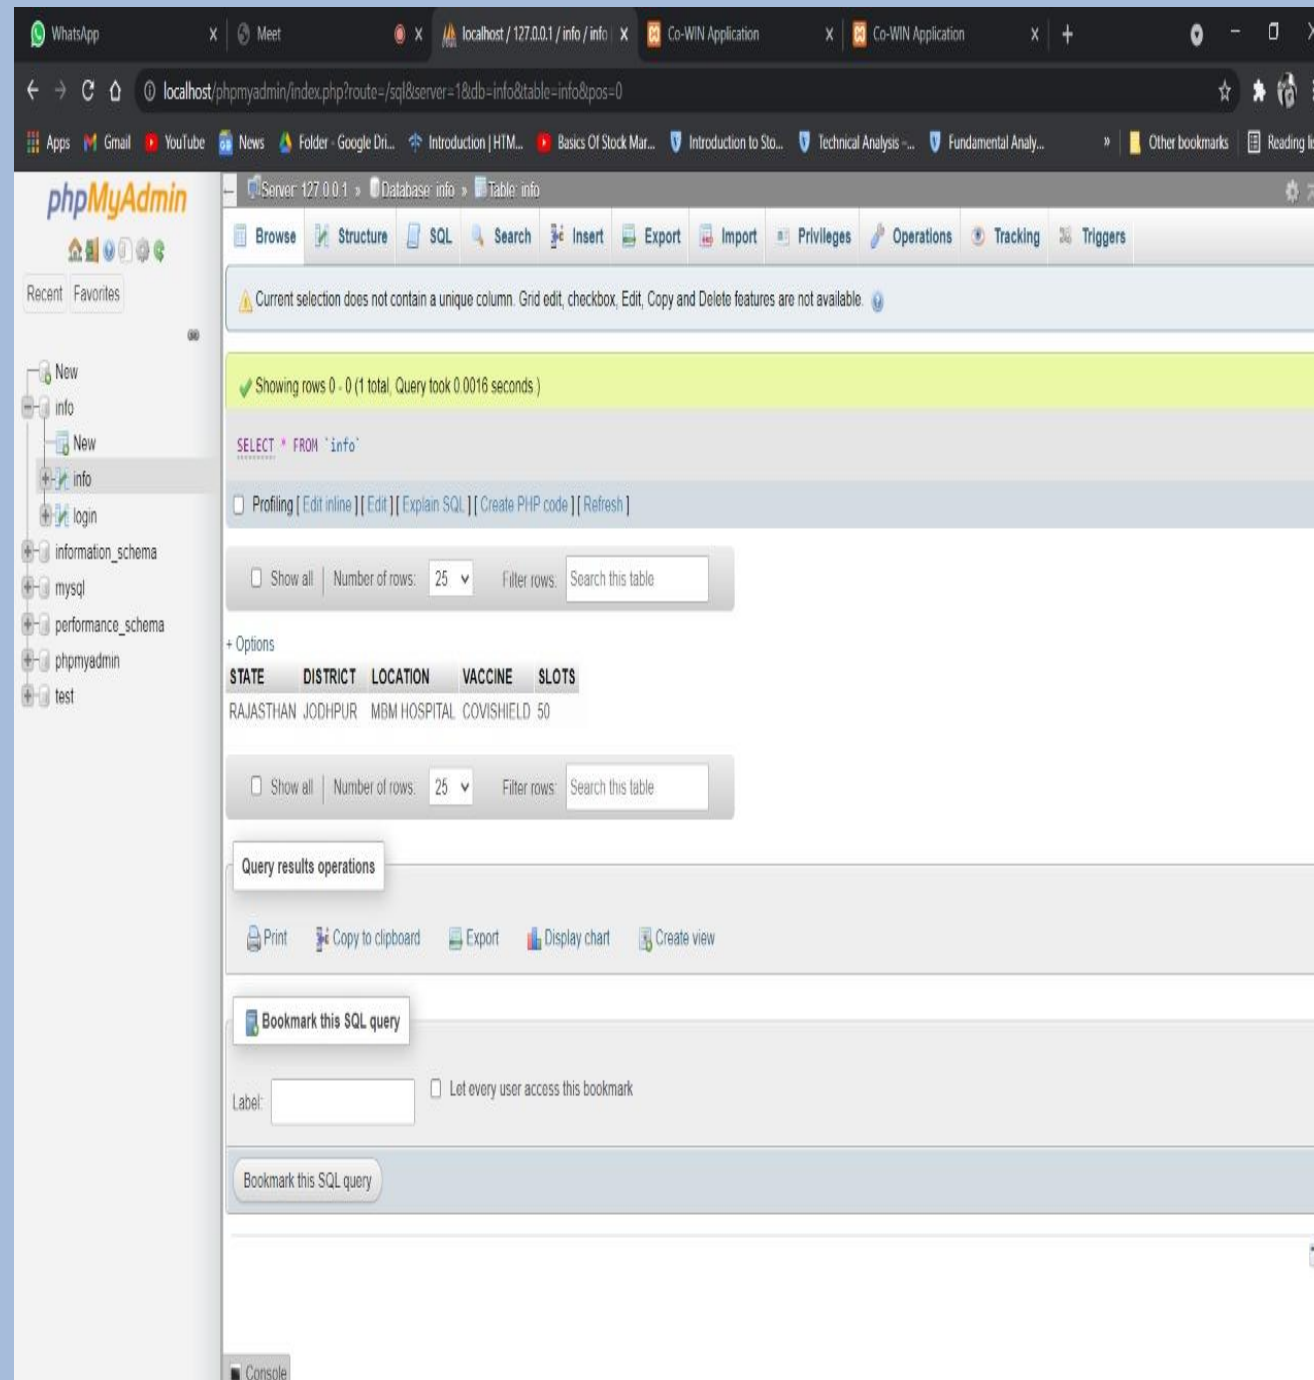

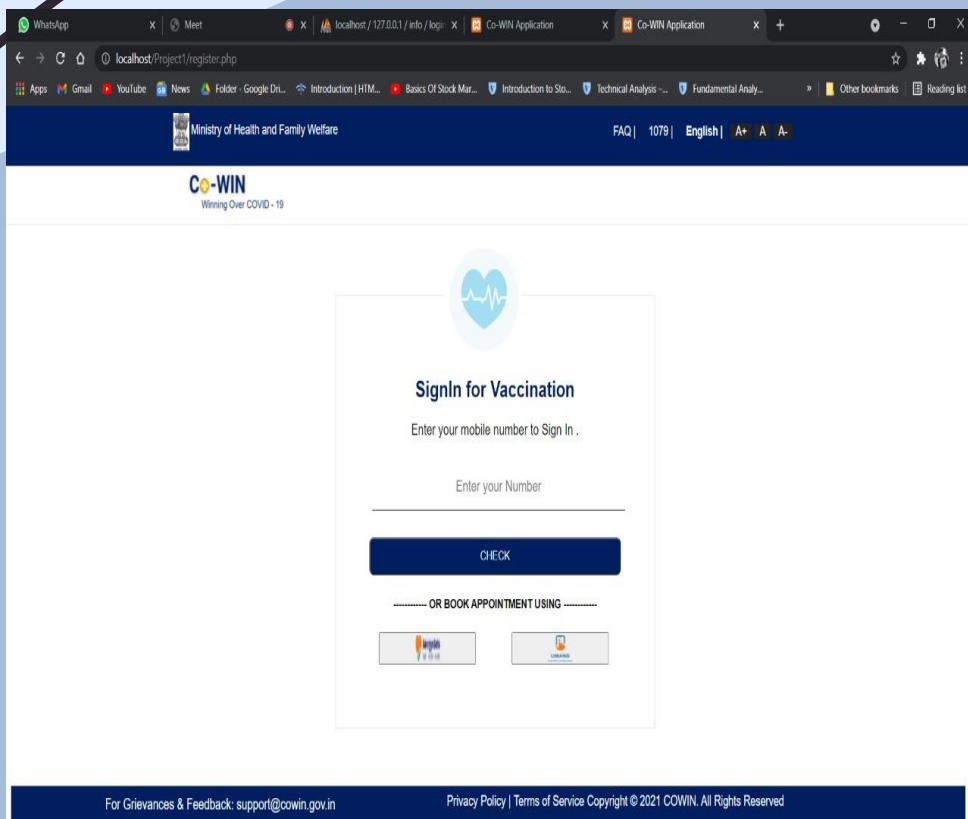

The vaccination schedule published by DIOs and private hospitals displays the list of vaccination centers with the following information

- The vaccine type.
- The age group (18-44/45+ etc.).
- The number of slots available for dose 1 and dose 2.
- Whether the service is Free or Paid (Vaccination is free of cost at all the Government Vaccination Centers).
- Per dose price charged by a private hospital.

If you are seeking 1st dose vaccination, the system will show you only the available slots for dose 1. Similarly, if you are due for 2nd dose, the system will

WORKING SNAPSHOT

CONCLUSION

The project is only a humble endeavor to satisfy the client's needs for managing their project work. Several user-friendly coding has also been incorporated. The goal of software planning is to establish a framework for completing projects within a limited timeframe at the beginning of the project.

Therefore, after implementing all the mentioned libraries as well as software tools, we finally full-fledged website where users can make an account, log in and also post their vaccination data whenever they want.

THANKYOU
